- **Preventative Burden of Proof Framework:** A revolutionary approach that shifts the evidentiary standard from proving reversal of death to demonstrating prevention of mortality.
- **AGT System:** Comprising 28 distinct therapeutic compounds designed to target fundamental biological aging processes.
- **Comprehensive Biological Solutions:** Addressing all major age-related conditions including cancer, neurodegenerative diseases, cardiovascular issues, and hormonal decline.
- **Technological Integration:** Incorporating advanced computational models, wearable brain books, and digital consciousness preservation.
- **Global Implementation Framework:** Through the institutional structure of Tomorrow's World Order.
