

Human Shell Preservation System

Extend Your Life Span Up To 220 Billion Years

The Ultimate Backup For Your Existence

What is a Human Image or Shell?

A human shell is a perfect digital representation of a person's biological and cognitive essence. It preserves all your vital information, allowing for potential future restoration, cloning, or extended life existence.

Your shell acts as a complete backup of your physical and mental self, safeguarding against the irreversible changes that occur after death.

Benefits of Creating Your Human Shell

Extended Lifespan

Preserve your biological information to potentially extend your life up to 220 billion years in good health.

Death Reversal

Restore sensory functions lost after death including taste, excitement, and other vital senses through code restoration.

Youth Preservation

Maintain your physical appearance at your prime (age 22) and reverse aging effects like grey hair.

Future-Proofing

Ensure your existence continues even as your biological body ages or fails.

Heaven Optimization

Enhance your post-life experience by preserving senses and capabilities that would otherwise be lost.

Biological Backup

Create a complete DNA replica with all predefined parameters for potential future restoration.

The Creation Process

Our advanced system uses MGI (Molecular Genetic Imaging) technology to map and preserve your complete biological and cognitive essence.

1

Initial Assessment

Comprehensive biological and cognitive analysis to create your unique genetic and psychological profile.

2

DNA Sequencing

Complete 53 billion 800 million DNA sequence mapping to capture your unique genetic blueprint.

3

Cognitive Mapping

Recording of neural pathways, memories, personality traits, and consciousness patterns.

4

Shell Encoding

Conversion of biological data into create codes that can be stored and potentially reactivated.

5

Secure Storage

Your shell is stored in our ultra-secure World Safe Vault with 4 billion individual lockers.

6

Activation Readiness

Your shell remains ready for potential future activation, restoration, or transfer.

Why Act Now?

With only 4 billion available shell spaces for nearly 8 billion people, half of humanity may miss this unprecedented opportunity for extended life and preservation.

Those without a preserved shell may be limited to a natural lifespan of around 100 years, while shell owners could potentially live for thousands or even billions of years.
