

Rotating Vector Animation System

Restart Animation

Animation Details

Vector Properties

Phase 1: 28 full rotations (10,080°)

Phase 2: -20 rotations back (-7,200°)

Final Position: 2,880° (8 rotations)

Duration: 15 seconds

Type: CSS-based circular vector

Direction Indicator: Arrow pointer

Animation: Smooth ease-in-out

Status: Animating...

Main Application Code

```
// Your main application logic goes here // This could include cryptocurrency wallet functions,  
// blockchain interactions, or other core functionality function initializeApplication() { //  
Initialize your app here }
```

Vector Animation Controller

```
// Custom vector animation logic // You can replace this with more complex animation code class  
VectorController { constructor(element) { this.element = element; } // Add your vector control  
methods here }
```

Utility Functions

```
// Helper functions and utilities // Math calculations, data processing, etc. const utils = { //  
Your utility functions here };
```

API Integration

```
// API calls, data fetching, external integrations async function fetchData() { // Your API  
integration code here }
```

Event Handlers

```
// User interaction handlers, form submissions, etc.  
document.addEventListener('DOMContentLoaded', function() { // Your event handling code here });
```
