Why Bitcoinayt Should, Will and Must Be The Main Stream Digital Currency

By David Gomadza | www.twofuture.world

The Universal Wallet

Everyone in the universe has a creator-made Bitcoinayt wallet inserted by the creator during creation. This wallet enables humans to store value, send and receive money as part of a system designed to reward intelligence and understanding of creation.

Initialize Your Bitcoinayt Wallet

Try initializing your built-in Bitcoinayt wallet with this command:

```
Type: initialise bitcoinayt wallet
```

Initialize Wallet

Advantages of Bitcoinayt

Universal Accessibility

All 8.5 trillion creatures in the universe have the Bitcoinayt wallet as a predefined design, making it ready for universal trade.

Ease of Use

Operated through voice or body language with simple commands like "create.send(nameofcoinxquantity)".

Enhanced Security

Uses individual voices as a security feature, making it the safest wallet ever created.

Multi-Coin Support

Can hold several coins at the same time and even store body elements essential for human function.

Dual Storage System

Value is stored both inside your body and on a memo-like blockchain, providing redundancy.

Life Extension

Can be used to extend life with a minimum of 10,000,000,000 Bitcoinayt for 23,864 years.

Interactive Bitcoinayt Experience

Ask Bitcoinayt: "What can be done?"

The Bitcoinayt wallet can answer questions and guide your financial decisions.

Ask: What can be done?

Ask Bitcoinayt

The 13 Wallets System

Bitcoinayt is part of a sophisticated system of 13 integrated wallets, each with specific functions:

aj wallet

Contains white gold, valuable on other planets like Ost.

ajt wallet

Carries white silver, valuable in other parts of the world like Mozambique.

aet wallet

Used to ask others what can be done.

aejt wallet

Used to store oil for milk in making cheese for the gods.

asutero wallet

Stores a new machine for blood transfusion.

gi wallet

Carries water inside as a main source to cool things down.

And finally, the Bitcoinayt wallet itself, used to tell everyone what to do and when to do it.

The Future of Currency

Bitcoinayt represents the currency of the future that will unite all the world into one. Without this money, there won't be any future, as Yahweh already created everything in advance so that if someone asks "what can be done," this wallet can answer.

David Gomadza, as the founder of Bitcoinayt, has created the first ledger-based simple blockchain that will revolutionize how we think about and use money.
